### STEP 1 RECORD A VIDEO CLIP

#### If the image is not captured...

Is there enough power left in the battery? Recharge the battery pack.  
(See "CHARGE THE BATTERY PACK" on the reverse side.)  
Is an SD Memory Card installed in the camera? Install a card.

### STEP 2 CAPTURE A STILL IMAGE

You can capture a still image while recording a video clip.

## STEP 3 VIEWING IMAGES

## STEP 4 ERASING IMAGES

### Did your photos turn out the way you hoped?

Even if you make a mistake, it's easy to erase the pictures you aren't satisfied with. Unlike film cameras, with a digital camera you can take all the photos you want, keep the ones you like and delete the rest.

## CHARGE THE BATTERY PACK

Use the supplied AC adaptor to charge the battery pack while it is installed in your camera.
