"路徑規劃"簡易使用手冊
Routing Quick Guide

</div>

路徑規劃能輕鬆助你找出合適的方向,協助駕車人士更容易到達目的地

以下是使用路徑規劃的步驟:

The routing function of MapKing^{TM} supports maximum 9 mid-points and destinations with routing options.

1. 開啓 MapKing 主程式 Start MapKing	
2. 用筆在 PDA 屏幕上選取任何一點作起始點(建議選取道路), 按下起始點. (也可用作建立目的地及經過點). Pick any location in map by stroke(Roads recommended) as starting point, mid-points or destination.	

3. 按"ok"確認路徑點 重覆以步驟 2 選取目的地或經過地 (經過地最多為 9 個) Press "ok" to confirm routing point Repeat step 2 to setup routing point	MapKing香港PPC 04:49 **ok** **設定航點** 北緯: 114.171235 東經: 22.309899 名稱: 油麻地彌敦道 附註: 工具
4. 當完成設定路徑點後, 地圖上將出現兩個記號 代表起始點(S)及目的地(E), 按"工具->搜尋->路徑規劃" 進入路徑規劃視窗. After Start point and end point setup, symbol (S) and (E) which represent Starting point and Ending point respectively will be shown. Now press 'Tools' -> 'More' -> 'Routing'	MapKing香港PPC 04:49 關閉地圖 記錄檔 檢視 風格 進階 搜尋… 我的地標… GPS 路徑規劃… 軌跡 系統設定… 說明 關於… 工具

5. 在路徑規劃視窗按下"路徑規劃, 電腦會助您計算路徑總長度及建議路徑. 您也可以更改選項, 選擇自已的路徑規劃選項 Press 'Routing' to achieve the result. (Press ok to exit after). The length and recommended path will be display. You may change the setting of routing function in 'Option'.	
6. 按"ok", 規劃結果會以不同顏色顯示, 如右圖 Press "ok", the geographical result will be shown by manifestly colour.	

註:路徑規劃資訊只供參考, 不能保證絕對正確, 包括改道造成的影響等種種因素,祈請見諒

Remarks: User shall aware the limitations of software route planning in reflecting the actual turn restrictions and traffic management measures for different types and lengths of vehicles in different time slot etc., the suggested routes of MapKing™ are for reference only and drivers shall always follow road guidance or road sign when driving.
